Dear Mark,

Thank you again for Daco Solutions for coming up with another bespoke solution for our label production requirements.

Not only that you were competitive, your speed and quality has been astonishing from the very start. My feedback isn't for one machine, but all 3 machines we have bought from you guys over the course of last 3 years.

We are really impressed with our latest purchase of the Daco DF350SR for the finishing of digitally printed labels from our HP Indigo 6900 Press. The machines' ease of use and speed of up to 65m/minute is impressive. It also allows us to produce thermal roll labels, lamination, coating and varnishing.

Most importantly for Flexi Labels, none of the machinery has ever broken down meaning we've never lost any time on Daco machines.

If you are looking to start a labelling or packaging business, I would recommend speaking to these guys first.

Assad Gilani
Operations Director
