Dave & Mark,

I just wanted to thank you once again for the market leading service we have received from the whole team at Daco, from initial consultation about the needs of our growing thermal label production team through to delivery, install and training on our fourth Daco label machine, the whole experience has been easy.

Our new Daco PLD350 is a great way for us to increase capacity, the large unwind allowing for supply master rolls of 1m reduces the downtime for roll changes, and the patented semi-auto turret to speed up the making off of our finished label rolls is a big hit with our lead operator as she has got to grips with the machine in a matter of days and productivity is already significantly improved.

It's great to deal with a company that excels in design and build quality, and above all else is made in the UK and backed up by great support, from people who actually understand the needs of a label converter.

We are hugely excited by the fact that this will allow us to continue to grow our volume whilst keeping lead times to a minimum for our customers.

Thank you again!

Yours sincerely

Trevor Voisey
