10th August 2020

Dave & Mark,

I'd like to thank you both again for the outstanding advice and service received in the purchase of our new machine. As you know, this is our third Daco machine, we knew to expect a top quality, well thought out and reliable machine, but were still blown away by some of the features of this model.

The DF350SR is the perfect next step for us, alongside our existing DTD250 machines this will not only allow us to increase capacity to deal with our growing demand, it also gives us the flexibility to offer in house label tinting, varnishing and single colour print with the UV flexo station, previously we had to outsource this requirement with varying degrees of success.

The Semi-Rotary running mode also allows us to die cut to registration and finish short to medium run digitally printed label work produced on our dry toner digital label printer.

We are hugely excited by the fact that this will allow us to finish 99% of our work in house and keep lead times to a minimum for our customers.

Thank you again and we'll see you next year for the next machine!

Yours sincerely

Trevor Voisey
